

# SUMMER CAMPS

## DISCOVERY CAMPS for Ages 7-11 years

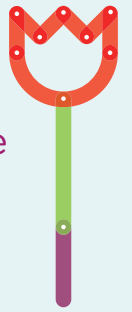

5-DAY CAMPS, MONDAY – FRIDAY, 9:15 am - 1pm

Fee: \$170/session for Members, \$190 for Non-members

*Instructed by the Museum's Education team*

Our Discovery Camps are for kids ages 7-11 years. These camps focus on bringing art and science right to kids' fingertips, and explore a wide variety of topics with hands-on STEAM activities and exploration.

### Choose between the following camps:

#### ART MASTER CLASS JULY 24-28 (Monday-Friday)

What makes this camp a master class? Why, learning from the best of course! Kids ages 7-11 will have several local artists join them and teach them their techniques and help campers make their own. This class will end with a special gallery show for family and friends.

#### ECO-EXPLORERS AUGUST 14-18 (Monday-Friday)

The natural world is full of wonders to explore, even in your own backyard! Have you ever watched a spider spin a web, or wondered if animals have super powers? This camp, for kids ages 7-11, will introduce participants to animal communication and adaptations, as well as local plants, animals, and ecosystems through nature exploration, games, and art projects. We'll be exploring outside, and creating our own wild beasts to take home!

**Please note:  
Registration  
will close  
one week  
before each  
class begins.**

**Space is  
Limited  
Register  
Today!**

**CHILDREN'S  
MUSEUM**  
of NEW HAMPSHIRE

#### ADVENTURES IN CHEMISTRY JULY 31 - AUGUST 4 (Monday-Friday)

Want to get hands-on with cool chemistry experiments? It's easier than you think! In this camp, for kids ages 7-11, we'll check out the different chemical reactions that happen around us all day, from baking to bath bombs, slime to cabbage juice! Work with your fellow campers to create awesome experiments, and get some experience with the STEAM Lab's science equipment, including our FLoid Imaging System microscopes!

#### CARDBOARD ENGINEERS AUGUST 21-25 (Monday-Friday)

What can you make out of ordinary cardboard? In this camp, we're going to find out! Utilizing the engineering/design process, kids ages 7-11 will work on taking a building idea and bringing it to fruition with cardboard, imagination, and lots and lots of tape! Do you want to build a giant unicorn? Maybe a spaceship? We'll work in teams to make something amazing, and then display our creations at this year's Dover Mini Maker Faire!

**CALL (603) 742-2002  
TO REGISTER**
